

PCI Brand® by Premium Compatibles Inc.

For more than a decade Premium Compatibles has been manufacturing OEM quality print consumable in the USA. PCI Brand takes great pride in our reputation for bringing top quality OEM grade consumables to the marketplace by maintaining the highest standards for Quality Control, Value and Customer Service.

- PCI Brand® has the greatest breadth of products in the industry. With over 3,500 imaging supplies that work in more than 30,000 print engines, no one brings you more opportunity for savings than PCI. This makes ordering for large corporations much easier and cleaner, one brand of OEM grade, high quality ink and toner for all brands of printers at substantial savings.
- More than 80% of PCI Brand® products are manufactured in the United States under constant supervision and frequent quality control checks.
- Quality control is the key to customer loyalty. 100% of all PCI Brand® remanufactured cartridges are post tested for quality. This is one of the most important reasons to buy PCI. Knowing that the PCI Brand® cartridge you are about to place in your printer has already been tested for print quality, density and functionality in our PCI Quality Control Lab means peace of mind for you.
- PCI Brand® ink and toner are backed 100% by our Premium Promise™ Factory Direct Warranty. Other manufacturers force customers to go to the point of purchase for assistance. Not PCI. If there is an issue, we take care of the customer directly and immediately. Reduce downtime and the hassle of multiple calls for help. Buy PCI and know you are one call away from assistance.
- Going Green with Black, Magenta, Cyan and Yellow. PCI Brand® products are environmentally friendly and we provide free recycling for all PCI Brand® and OEM brand toners. It can take mother nature up to 1,000 years to breakdown a cartridge in a landfill. We make it easy for our users to recycle.
- When you buy PCI you don't have to worry about counterfeit or clones. Knock off products can violate intellectual property rights and patents. PCI fully respects and maintains the rights of OEM printer manufacturers and our manufacturing procedures reflect that. We are proud that we have never been in a law suit with an OEM.
- Premium Compatibles is a proud USA owned and operated corporation. All calls to Premium Compatibles Inc. are answered by our employees here in the USA. Many of our competitors rely heavily on cheaper wages in Mexico and China to remanufacture their products. PCI's Made in the USA strategy will protect customers from price fluctuations and product availability issues that will arise as the government implements Made in America policies.
